

caesarstone®  
*Classico™*

◀ Frosty Carrina 5141

# Make a statement

Caesarstone is a beautiful engineered quartz stone which comprises approximately 93% natural quartz.

Practical, durable, and attractive, it has significant advantages over natural stone and other surfacing materials due to its superior strength and quality.

\*Compared to granite, while outperforming marble

# Safe, clean surfaces

Caesarstone quartz surfaces are designed to offer a practical, hygienic and environmental-friendly solution for moist and humid surroundings.

Their non-porous nature makes them resistant to water and thus to mold, mildew and bacteria, making them ideal for use in humid environments, especially bathrooms, spas, wet saunas, bath houses etc.

# Minimal maintenance

## *Ideal for bathroom applications...*

Caesarstone's quartz surfaces never need sealing and require minimal maintenance to keep them looking like new. Their hard, non-penetrable surface makes cleaning simple and in most cases, soap and water or a mild detergent are all that are required to maintain its lustre.

No matter what your spa or bathroom demands, Caesarstone products enhance and inspire designers to create an atmosphere of relaxation and serenity.

# Our colour range

With 32 colours stocked in the UK and over 70 colours available globally, Caesarstone offers customers the widest possible range of designed quartz surfaces with the finest texture options available in the quartz surface industry today.

In collaboration with Caesarstone's designers, the research and development team is continually developing leading-edge colours and designs that influence trends and inspire creative, functional applications.

Please see [www.caesarstone.co.uk](http://www.caesarstone.co.uk) for colour options or view/request our colour palette sample case.

## The Supernatural range

The nature-inspired designs give the surfaces the look of natural stone in earthy tones, with its rich texture-like appearance similar to that of a classic marble look. So not only is the Supernatural range aesthetically stunning, it also benefits from the durable qualities Caesarstone's quartz surfaces possess.

## Colour options

Caesarstone's quartz surfaces retain the cool, tactile qualities of natural stone while enabling the user with a durable work surface designed for ease and convenience.

Designs range from fine-grained salt-and-pepper patterns to coarse-grained colour blends with a variegated visual texture. Each surface has a perfectly polished finish.

## Slab dimensions

The standard slab dimensions of Caesarstone's quartz surfaces are 3060mm x 1440mm, three thicknesses are available: 20mm, 30mm, and 13mm on selected colours.

Thickness	Slab Weight	Slab Weight/m2
30mm	330kg	75kg/m2
20mm	220kg	50kg/m2
13mm	145kg	33kg/m2

Caesarstone is made from natural quartz and as such some variation in colour and aggregate may occur. We always recommend making final colour selection off an actual sample of Caesarstone as the colours depicted in this brochure are only as close as modern printing methods will allow.

Note: Whilst every effort is made to ensure accuracy and colour, it is not always possible to reproduce actual colours due to limitations of the printing process.

# Peace of mind...

## ISO 14001

Caesarstone was the world's first quartz surface company to comply with ISO 14001, the international standard for environmental preservation regulations. This guides our working according to environmental goals; monitoring activities; investing in tools for enhancing a quality environment; training employees and suppliers; implementing health and safety procedures and maintaining environment-friendly production processes.

## GREENGUARD

All Caesarstone surfaces comply with American GEI (GREENGUARD Environmental Institute) certification ensuring they are safe for the environment, do not release harmful substances into the air and thus contribute to improving indoor air quality.

## LEED

Developed by USGBC (United States Green Building Council), Leed (Leadership in Energy and Environmental Design) is the American accredited certification program for design, construction and operation of high performance green buildings. Caesarstone's high LEED ranking proves our compliance with ecological standards and makes us natural partners for green buildings. Working with Caesarstone products ensures architects and contractors a high LEED score for their projects.

# *Low maintenance*

Caesarstone's quartz surfaces never need sealing and require minimal maintenance to keep them looking like new.

The hard, non-penetrable surface makes cleaning simple and in most cases, soap and water or a mild detergent are all that are required to maintain its lustre.

## *15 Year Guarantee*

Every Caesarstone surface comes with a comprehensive 15 year guarantee to provide further peace of mind.

# Surface care...

Caesarstone quartz surfaces require only simple and routine care to maintain its stunning appearance. To clean Caesarstone we recommend using warm water and a mild detergent or quality 'spray and wipe' cleaner. Stubborn stains or dried spills. Any multi-purpose cleaner or detergent can be used on stubborn stains, for a more thorough cleanse a good quality, mildly abrasive cream cleaner is recommended.

To remove adhered materials like food, gum and nail polish firstly scrape away the excess with a sharp, flat blade or plastic putty knife. Any grey metal marks that may be left can be removed with a regular cleaning agent. Bleach and acetone can also be used, if required, however the surface should be rinsed with water immediately after use. Avoid the use of alkaline products (pH 8.5 or higher), such as oven cleaner or paint remover as they may etch and damage the surface.

Heat resistance Caesarstone can tolerate moderately hot temperatures for brief periods of time. Prolonged exposure might result in discolouring or otherwise damage the surface. Direct contact between very hot pots and the Caesarstone surface should be avoided. We recommend using an insulator/hot pad/pot stand/trivet, especially when using cooking implements like frying pans, woks or kettles.

## *Tough – Yes, indestructible – No.*

As with any surface, Caesarstone can be permanently damaged by exposure to strong chemicals and solvents that undermine its physical properties. Do not use products that contain trichlorethane or methylene chloride, such as paint removers or paint strippers.

Avoid any highly aggressive cleaning agents like oven/grill cleaners and dishwasher agents that have high alkaline/pH levels. Products containing oils or powders may leave a residue and should be thoroughly rinsed off. Should your surface be accidentally exposed to any of these damaging products, rinse immediately with water to neutralise the effect.

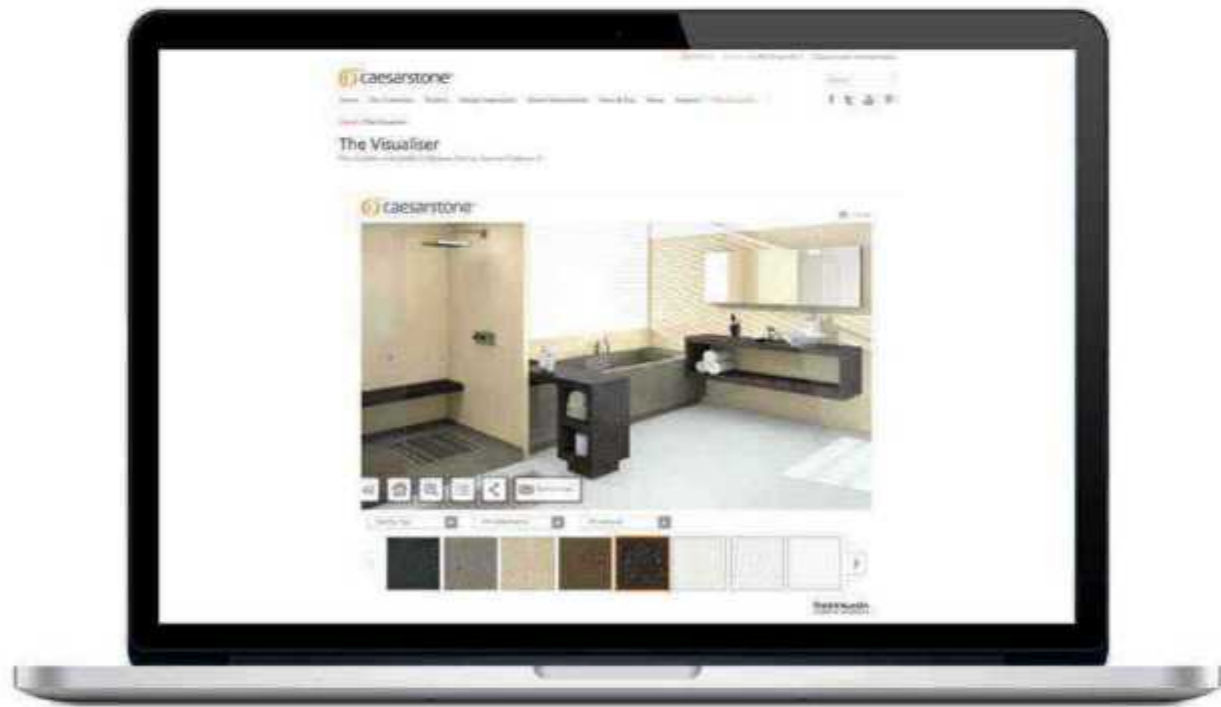

Scratch resistance Caesarstone is a scratch resistant surface; however, avoid abuse using sharp objects such as sharp knives or screw drivers directly on to the surface.

# The Visualiser

Release your inner designer and experiment with Caesarstone's variety of colours and textures. You can also share your creation on Facebook and Twitter.

Please see [www.caesarstone.co.uk](http://www.caesarstone.co.uk) and select 'The Visualiser' from the menu.

The Visualiser is available in Chrome, Firefox, Internet Explorer 9

*"Caesarstone's quartz surfaces look fantastic, but they're also very durable – and importantly, they're also largely resistant to stains and scratches."*

◀ Mink 4350

## *Case Study – In the home...*

A five metre long island, topped with Caesarstone's stunning Mink (4350) from the Classico Collection is the focal point of this beautifully understated new kitchen in West Yorkshire. Designed by Andrew Holdsworth from Holdsworth Design Practice Ltd, Alston, Caesarstone's Mink quartz, which is made from 93% natural materials, is the perfect partner for the scheme's timeless stylish ivory Shaker cabinetry.

The homeowner says: "We've had a couple of informal brunches and suppers, more than a few coffee cup rings have been left behind and the kids have even done some craft projects – complete with glitter and gloop – but so far, the surface has been fantastic. And it's a doddle to clean – no specialist materials are needed, just soap, water and perhaps a standard kitchen spray. It looks as good as new in seconds and there's zero fuss."
