THE POWER AND AESTHETICS OF QUARTZ COMPOSITE

unistone

unistone

Unique expertise, unified in high-quality blended materials

- ◆ Top quality quartz composite (> 90% natural quartz)
- ◆ Very low maintenance: acid, scratch, and stain-resistant
- ◆ Low water absorption

- ◆ Breton technology
- ◆ Food-safe & certified antibacterial
- ◆ Both plain and veined design
- ◆ Unique patterns throughout the thickness of the slab

COMEBACK QUEEN

Unistone quartz composite effortlessly combines aesthetics with durability. Not only does this material look beautiful, it is also extremely hard.

More than 90% of it consists of natural quartz: the high-quality result of the tried and tested Breton technology, in which natural quartz grains are mixed with polymers. The result is an unseen combination of strong technical properties. For example, Unistone stands for high stain and scratch resistance as well as low water absorption—ideal for use in your home in kitchens and bathrooms, among others.

A selection of our finishes

The finishes shown here are standard finishes, but many other options are also possible. We are also constantly developing new finishes and optimising existing ones at Brachot Surfaces, which means we always find the finish that best suits the material, your tastes, and the style of your home.

Polished

Without a doubt, the glossiest and smoothest finish, highlighting the colours, patterns, and white spots. Dark shades create a mirror effect.

Honed

The surface is scoured until a warm, matt shine is obtained. The grain size during scouring determines the final result.

Velluto

Innovative finishing method developed within Brachot. A velvet, matt finish with warm colours that's very maintenance-friendly.

Choose the design that suits you

Whatever your plans are, there's always a Unistone design that fits in perfectly with them. Unistone is available in over 50 colours, from snow white to pitch black – and everything in between. The extensive palette focuses on natural nuances with visible or camouflaged structures. You can choose between numerous patterns, from a marble look to the look of granite, limestone, concrete, and much more.

Two sizes, three thicknesses

Unistone slabs are generally available in two sizes: the standard size of 300 x 140 cm, and a jumbo size of 330 x 165 cm. The advantage of the jumbo format is that a complete, final product, such as a kitchen worktop, can be produced immediately, with little or no seams.

In addition, various Unistone slabs are offered in three thicknesses, from 1.2 cm to 2 cm and 3 cm. In this way, this material lends itself to numerous specific indoor uses in different types of settings.

Opting for durable quality

Unistone Pietra Grey

Add Unistone's hardness and low water absorption, and you immediately know you're dealing with a particularly maintenance-friendly material. Unistone is highly resistant to scratches, stains, many chemicals, and much more. These durable and high-quality slabs have everything they need to last for many generations. We are happy to advise you on their specific maintenance, from initial cleaning to regular cleaning. For example, the polished Unistone surfaces usually do not require any additional protection, while the Velluto surfaces require specific impregnating agents.

CRAFTING VALUE FOR FUTURE GENERATIONS

Brachot Surfaces is a European producer of high-quality natural stone and composite materials with the brands Unistone (quartz composite), Unimarble (marble composite), Uniceramica (ceramics), and Terrazzo (cementitious slab material). Brachot Surfaces is thus a comprehensive supplier of high-quality slab material for interior and exterior finishing. Brachot Surfaces' success lies in the production of slabs in natural stone and composite materials, technical innovation in materials and finishing, as well as years of expertise. Knowledge and experience in the selection of superior blocks are an indispensable asset in the production of natural stone slabs. This makes Brachot Surfaces the ideal partner for the selection and purchase of blocks of natural stone.

Brachot Surfaces is a Brachot Family Member.
