

# Cleaning & maintenance

## **CLEANING AND MAINTENANCE INSTRUCTIONS:**

Our products are supplied already treated with a water and oil repellent treatment/sealant which provides the surface a good basic protection. To maintain the surface finish it is important to follow our "cleaning and maintenance instructions" and these should also be provided to end users by whoever has carried out the installation.

Please note that failure to correctly perform the "cleaning and maintenance instructions" could invalidate any warranty.

## **DO NOT USE:**

- Acid - based products (they can damage the surface)
- Alcohol-based products (they can remove the treatment)

## **FIRST CLEANING AFTER INSTALLATION:**

Use acid-free neutral detergents, designed for natural stone and marble, following the manufacturer's instructions.

## **PROTECTIVE TREATMENT:**

After initial cleaning, apply a water and oil repellent treatment/sealant to the material and on the joints in order to protect the entire surface.

## **DAILY CLEANING:**

Use an acid-free neutral detergent, for natural stone and marble, following the manufacturer's instructions.

## **IMPORTANT:**

For maintenance of the Agglotech surfaces, dirt must be regularly removed and daily cleaning should be carried out correctly.
