

## TYPES OF FINISH

Arklam Countertops is a coloured sintered mass perfect for kitchen countertops. It is available in 5 different finishes: **Silk**, highly resistant; **Polished**, with a mirror reflection that provides depth and elegance; **Matt Polished**, with a slightly polished matt effect; **River Washed**, a natural finish with a stone effect; and **Hond**, the matt finish by excellence.

Each finish is designed and tested to withstand the most demanding uses and resistance to all types of stains. However, for its **cleaning and maintenance** it will be necessary to take into account some cares that will make our Arklam worktop keep in perfect condition and look impeccable like the first day.

Arklam Countertops **applications** are suitable for indoor and outdoor use. Check [www.arklam.es](http://www.arklam.es) for the countertop that best suits your space and needs.

The Ark Lam logo is displayed on a black rectangular background. The words "ARK" and "LAM" are in a large, stylized, serif font, with a horizontal line between them. Below the logo, the tagline "QUALITY DOESN'T FEAR TIME" is written in a smaller, sans-serif font. The background of the entire page is a light-colored, marbled countertop with a white vase and a gold-tipped vase.

**CLEANING AND CARE GUIDE**

ARKLAM COUNTERTOPS

## CLEANING AND MAINTENANCE

For optimal maintenance of Arklam Countertops, regular cleaning with a **rag moistened with soap and water** is recommended. In addition, it is advisable to clean stains as soon as they are produced and not to let them dry out.

If the stain is not recent and has become embedded, warm soapy water should be applied for a few minutes to soften the dirt and then removed with a damp rag.

As for the material used to remove the stains, we recommend **soft rags and blue anti-scratch pads**. The more respectful the material used for cleaning, the better the maintenance of the worktop.

**Abrasive products or bleach should be avoided at all times.** If the latter is used, it should be lowered with water and not left to act on the Arklam surface for a long time. It is important to pay special attention to the polished finish as it is more sensitive to abrasive products than other finishes.

Although Arklam's sintered mass is fire and heat resistant, whenever possible, a **protector should be used to support hot pots or pans**. It is also important to use cutting boards to avoid cuts and knocks on the worktop as much as possible, especially when using ceramic knives and instruments.

Arklam Countertops is a material with a high resistance to shocks, scratches, heat and chemicals. But it is always important to take care of the material, protecting it as much as possible as you would any other type of countertop.

## CLEANING PRODUCTS

In general, Arklam Countertops can be cleaned with any product used in daily household maintenance. However, in order to maintain Arklam's condition as it was on the first day, it is recommended not to use abrasive products (especially in the case of polished finishes).

### Recommended products:

- Dishwasher
- Grease remover
- Ammonia
- Solvents
- Oven cleaning products

### Products to avoid:

- Bleach
- Abrasive cleaners
- Abrasive sponges or scourers
- Iron oxide stain remover
- Hydrofluoric acid

### VERY IMPORTANT

### BACTERICIDAL EFFECT

During our lifetime, we are constantly exposed to high levels of bacteria.

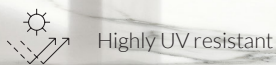

With Arklam your countertops will be more hygienic and safe thanks to its anti-fungal and anti-bacterial properties.

### SELF-CLEANING

Hidroflicity - less water needed.

With Arklam, any cleaning tasks become easier and more enjoyable since less quantities of detergents and cleaning products are needed.

Highly UV resistant

Frost resistant

Waterproof

Resistant to high temperatures

Resistant to scratches

Resistant to stains
