

The New Classtone / Abu Dhabi White

PRODUCT DATA SHEET

The New Classtone / Abu Dhabi White

Description

The inspiration for this model comes from classic white marble; in this case, featuring golden grayish veins on an off-white background. It's offered in Décor Polished and Silk finishes. This last finish simulates the effect of an eroded surface in line with a golden vein design for a more natural look.

| Finishes | Thickness |
|----------------|----------------------------|
| Décor Polished | 6mm 12mm |
| Silk | 6mm 12mm 20mm 3mm |

Recommendations for use based on the thickness

6mm

The most versatile thickness. It can be used for indoor and outdoor cladding. It is also appropriate for both outdoor and indoor flooring as well as for furniture and cupboards.

12mm

The recommended thickness for tables and countertops in kitchens and bathrooms.

20mm

The maximum thickness is appropriate for tables and countertops in kitchens and bathrooms.

3mm

Recommended for all types of vertical cladding: walls, furniture and cupboards.

For more information on the thickness indicated for each finish, check with your professional.
